Education in Colombia and Latin America is characterized by significant gaps in the quality of education as measured by standardized test scores. This paper assesses the impact of a Colombian program called *SaberEs*, which strengthens preparation for standardized cognitive tests such as the high school exit exam in Colombia (*Saber 11*) for low socioeconomic status students. The program provides competency-based training sessions to develop skills for analyzing and solving specific types of questions within school hours. Our difference-in-differences estimates show that *SaberEs* increased *Saber 11* scores by 2.22 ranks (or 0.074
